

**Every page you print  
fights climate change**

**Sustainable Managed Print Services**

Offset your office's environmental impact  
Become print carbon neutral – even positive!  
Promote your sustainable business practices

Free maintenance and repair services  
Automated “just-in-time” toner installation  
Guaranteed 4-hour on-site service  
No contract. No need to buy new equipment

**... join our network of global reforestation projects**

Faster, better service  
Dramatically reduced operating costs  
Free up your talent for core business technology

Now your organization can offset the environmental impact of office printing by replanting trees across a global network of certified reforestation projects.

Offset every page that you print. Automatically. Absolutely free.

## HOW IT WORKS

In partnership with the PrintReleaf Exchange, **opencopy** provides a free, automated way to participate in sustainable business practices and use office printing to offset your organization's print carbon footprint.

Our remote monitoring software already measures your organizations monthly paper consumption. Now through a global network of certified reforestation projects, the program coordinates the planting of replacement trees in deforested areas such as Brazil, Mexico, Ethiopia, Burkina Faso and Madagascar.

Once your trees are planted, certified and verified, they are monitored by SGS International in a 8 year auditing process to track the survival of your trees. Your organizations web portal automatically displays the status of your chosen projects and your social media platforms are updated. It's absolutely free. Join now.

## SHARED VALUE

Your enrollment unlocks more collective shared value than just reforestation.

### Environmental Health

Trees are the best technology to cool the planet and promote rainfall

### Certification

Guaranteed reforestation and 100% net survival certified by SGS International.

### Jobs

New jobs and economic growth to local communities where we plant trees.

### Technology

Patent-pending technology and end to end automation for the entire program

### Branding

Automated promotion to update progress customer social media channels.

### Employee Engagement

Your employees play a key role in selecting and monitoring your reforestation projects
